PRELIMINARY AMENDMENT

Assistant Commissioner for Patents
Washington, D.C. 20231

Prior to examination of the above-identified patent application, please amend the above-identified patent application as follows:

IN THE CLAIMS

Please amend the claims as follows:

46. [New] A computer-readable medium having computer-executable instructions for performing steps to generate an object connection between a source object and a sink object, the sink object implementing a plurality of notification interfaces for communicating with the sink object, each notification interface having an associated interface identifier, and the source object having instances of a connection point interface, each instance of the connection point interface having an associated interface identifier, the steps comprising:

selecting a notification interface from among the plurality of notification interfaces of the sink object;

selecting an instance of the connection point interface of the source object, the selected instance having an associated interface identifier which corresponds to the interface identifier associated with the selected notification interface of the sink object;

using the selected connection point interface instance to request that the source object and the sink object be connected, wherein the request has a reference to an instance of the selected notification interface of the sink object; and

storing the reference to the instance of the selected notification interface, so that the sink object can be notified by the source object.

47. [New] A computer-readable medium having stored thereon an object connection architecture comprising:

a plurality of sink objects, each sink object having a notification function member for communicating with the sink object from a source object; and

a plurality of source objects, each source object having a plurality of connection point objects, each connection point object storing a plurality of notification function members and returning an identification of one of the notification function members from the stored plurality of notification function members upon request.

REMARKS

Entry of the above amendment is respectfully requested. Applicant respectfully submits that new claims 46 and 47 do not represent new matter as they contain the elements of U.S. Patent No. 5,485,617 claims 27 and 39, respectively, claimed in an article of manufacture format. A computer-readable medium is supported in the 5,485,617 patent at column 9, lines 15-18 which describes a computer system suitable for implementing Applicant's invention. The elements of both claims are supported, in general, by the originally-filed specification of the 5,485,617 patent. In particular, claim 45 is supported at column 15, line 38 through column 16, line 28, and claim 47 is supported in at column 9, line 60 through column 10, lines 10.

Respectfully submitted,

DAVID S. STUTZ ET AL

DECLARATION OF INVENTORS

BOX PATENT APPLICATION

Assistant Commissioner for Patents
Washington, D.C. 20231

We, David S. Stutz and Christopher A. Zimmerman hereby declare as follows:

1. We are citizens of the United States residing at 19610 N.E. 116th, Redmond, WA 98053, USA, and 3006 West Lake Sammamish Parkway, S.E., Bellevue, WA 98008, USA.
2. We believe that we are the original co-inventors of the invention disclosed and claimed in U.S. Patent No. 5,485,617, issued on January 16, 1996, entitled "METHOD AND SYSTEM FOR DYNAMICALLY GENERATING OBJECT CONNECTIONS," and claimed in the application filed January 16, 1998 for which we solicit a reissue patent.
3. We have reviewed and understand the contents of the specification and claims of the reissue application.
4. We do not believe that the invention set forth herein was ever known or used in the United States before the invention thereof by ourselves.
5. We acknowledge the duty to disclose information which is material to the examination to the reissue application in accordance with 37 C.F.R. § 1.56(a).
6. We believe the above-identified patent is partially inoperative by reason of claiming less than we, the inventors, had a right to claim in the patent. Such inoperativeness includes particularly the failure to prosecute and obtain claims commensurate with the scope of new claims 46 and 47 filed in the reissue application.
7. On information and belief, we further declare that the reasons which render U.S. Patent No. 5,485,617 partially inoperative arose without any fraudulent or deceptive intention on
